

AA HARRIS AERIAL

- 4 Hour Flights
- 5 Kg Payload Capacity
- 2000 Meter Service Ceiling
- 2.4 kW EFI Generator
- DC 12S (49V) Power Output
- 5.3, 12, 24, & 48 Volt Accessory Power

Carrier H6 Hybrid EFI

The Harris Aerial H6 Hybrid EFI is a unique Hybrid-Electric platform with exceptional stability, endurance, and an EFI Generator for improved performance and safety. The H6 Hybrid EFI is NDAA compliant and perfectly suited for the DoD, Government, and Commercial sectors with its enhanced telemetry. The EFI system adjusts in real-time to changes in atmospheric conditions providing optimum performance.

GCS Options

As our Carrier models cater to different needs so do our GCS solutions. Whether your needs dictate the use of a rugged 19" GCS or something more portable like our brand new hand held 8" GCS, the Atlas. HereLink Blue/Black options are also available (Non-NDAA 848 Compliant).

Harris C-GCS
